Cable Address: Columco

A STATEMENT of POLICY

by J. C. Moore, President.

In a few months we will celebrate the thirty-fifth anniversary of the founding of The Columbia School Supply Company. At the present juncture in the affairs of our institution we think that it is well to pass on to you a statement of our manufacturing policy—a policy which has been so essential to our progress and which is of such value to you as a purchaser of school supplies.

The history of The Columbia School Supply Company has been linked directly with the development of steel school furniture. The first steel school desk was developed by our engineers and our factory was the first to manufacture this type of equipment and for several years we were its sole manufacturers. In the course of time, however, others followed us in the path that we had pioneered until now the old-fashioned cast iron furniture has been definitely discarded and the type of steel furniture which we have developed is accepted everywhere.

The wide-spread acceptance of this steel furniture has justified the faith that the executives of our company have always had in its future. In the years since that first desk was made, we have directed every effort to the development of a model organization where plant and production efficiency would enable us to manufacture not only steel furniture and supplies, but a complete line of school accessories in the most economic way possible.

This has been our manufacturing policy and we believe that we have gone far in the attainment of our ideal. We have confidence in our organization and we earnestly believe that our experience, our highly specialized machinery and our plant and production efficiency enables us to give you in Columbia products more dollar for dollar value than it is possible for you to obtain elsewhere.

June 30, 1930

J. C. MOORE,
President.

400 Line—Codeword, Columdesk

ORIGINATORS OF STEEL FURNITURE FOR SCHOOLS

MOVABLE STEEL SCHOOL DESKS

Over twenty years ago this firm placed upon the market the first school desk with a steel frame. Other factories first scoffed at the idea and then followed.

Fourteen years ago we offered the first movable chair desk with an adjustable steel frame. Twelve other manufacturers are now following.

We have spent these fourteen years in constant, earnest effort to produce a perfect desk at a moderate price. It takes years to eradicate weakness and develop strength, endurance and beauty.

In the construction of this desk and all of our other products we use hot rolled filleted angle steel with rounded corner. If sheet steel strips were bent into angle shape the outside of the corner is stretched and weakened, while if the molten steel is forced into the rolls the steel at the corner is as dense as any other part and to reinforce this angle additional molten steel is forced in to create a "fillet" for extra thickness at this point of stress. Thus combining extra strength with beautiful outside curves.

The frames are electrically arc welded into the rigid structure which is self contained. The wood parts do not bear any of the stress or strain.

Solid wood parts may be had in either oak or maple, but the plywoods are only of maple. The finish is school room brown as adopted by the National Association, unless otherwise ordered and the steel frames are olive green.

The Columbia Indestructo Adjustable Movable Desk is illustrated on the opposite page. The top is adjustable in height and in tilt. Wood parts are of oak unless maple is requested and the wood is finished in school room brown. Steel parts are in olive green unless otherwise ordered. Steel back slats instead of wood may be furnished if desired. There are rounded corners on all angles.

K. D. FOR FOREIGN SHIPMENT

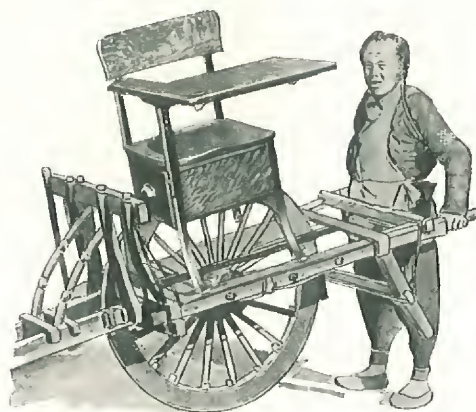

Where it is necessary to compactly crate our steel frames for desks or chairs, we manufacture them as above so they may be packed flat to take the low steamer rate.

Book Box Under Top.—This illustrates our No. 330 desk with a book box under the top and may be furnished on any desk at an extra charge of 30c.

Floor fasteners will be put on these desks without charge where so ordered.

Into every part of the world these steel desks have found their way.

Steel Furniture for schools is now displacing the older type even in foreign countries. The Columbia School Supply Company was the first to manufacture school furniture made of steel.

ORIGINATORS OF STEEL FURNITURE FOR SCHOOLS

COLUMBIA SCHOOL ROOM TABLES

In this catalogue we offer a new and distinctive line of beautiful steel tables for class room use.

The table is of pleasing design with a rounded angle steel frame so made that the legs will not interfere with the student's knees or feet. It may be shipped K. D., but when assembled it is as rigid as any school desk. It may be screwed to the floor if desired. Note the commodious book shelf. The steel frame is finished in olive green lacquer and the five ply maple top is finished in school room brown.

These new Columbia tables are made in our factory to the same exacting standard of other Columbia products. From the raw material state until they are unpacked in the school room, they enjoy that production and distribution efficiency that is characteristic of our organization. This results in more dollar-for-dollar value and sensible economy for you.

We recommend these Columbia tables to you as a practical, beautiful, and eminently useful addition to your present installation.

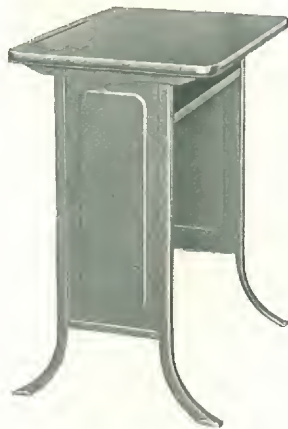

COLUMBIA SCHOOL SUPPLY COMPANY

COLUMBIA STUDENTS TABLE

Prices: (Solid Oak or Maple and other sizes on request.) Inkwells in four larger sizes only unless so requested. For slanting top add per desk 70c.

Table	Top	Height	Price

S T G	16x22	21	5.10

T T MODEL. We also make these tables with the back legs straight to the floor and the top set out two inches toward the student so he may get in and out without moving his chair. They have the book box and open back as S T model and sell for the same prices. If the straight back legs are desired change the letters S T to T T.

TYPEWRITER DESK T D

This desk is made of structural steel with rounded corners and paneled sheet steel ends and back. The top is set out toward the typist and rigidly supported by the curved feet which also enable the operator to get in and out without moving her chair.

The top is of oak 18x24 and 24 in. high. Each \$5.35.

Student's Table accommodating two pupils. The construction is the same as in the single table, the only difference being in the length. The larger sizes are 44 in. long and priced at \$8.60. The four smaller sizes are 36 in. and priced at \$8.40, without the chairs.

ORIGINATORS OF STEEL FURNITURE FOR SCHOOLS

Indestructette Tablet Arm Chair

Code word—Indestructettab.

Indestructette Tablet Arm Chair of slightly lighter construction than our No. 420 line, but yet stronger than those made of wood. Saddled seat and back as on our other desks and chairs; scroll seat when so ordered.

Weight each 18 pounds.

460—seat 18 in. high; 461, 17 in. high;	
462, 16 in. high.....	\$3.75
463, Seat 15 in. high.....	\$3.70

The Freight Classification on the Indestructo desks is low due to the very remote possibility of damage in shipment.

In less than car load shipments they take first class. If the seat boards and backs are put on, they may go as

third class in carload of 14,000 lbs. or over. Packed in usual way, two frames wired together and wood parts in boxes or crates, they go fourth class in car of 24,000 lbs. or over.

Due to the fact that the Indestructo is lighter in weight than the cast iron desk, the actual cost of delivery is less.

COLUMBIA SCHOOL SUPPLY COMPANY

Codewood, Columchair.

Columbia—Teacher's, Visitor's or Library Chair of real merit. It will never need to go to the repair shop. It is good looking and dignified. Oak saddled seat and quartered oak back in dark golden or brown finish. The steel frame is olive brown to harmonize with the wood.

We make this chair also in the smaller sizes for the junior library or kindergarten department.

ORIGINATORS OF STEEL FURNITURE FOR SCHOOLS

COLUMBIA SCHOOL SUPPLY COMPANY

Our H. P. chairs add to the beauty of this class room in the new Tabernacle Church of Indianapolis.

COLUMBIA STRUCTOFOLD CHAIRS

Folding chairs are indispensable for many of the modern school's activities. Assembly halls, whose floors must be cleared from time to time for calisthenics and other educational programs, may be quickly and conveniently converted into comfortable auditoriums for those functions that require the seating of large numbers of students and guests. The incidental uses of folding chairs about the class room and in the administration offices are innumerable.

Columbia Structofold chairs are strong and durable, being made entirely of steel. They are not only sanitary, but are not subject to the climatic conditions of store-a-way rooms as are wooden chairs. Columbia steel folding chairs are absolutely noiseless in operation, which is a great advantage, especially for school use. Structofold chairs are made in Indianapolis in our modern factory, which is located near the largest steel mills in the world. The Columbia School Supply Company has been making steel furniture for twenty-five years, thus accumulating an experience not possessed by those who have recently entered the field. We recommend Columbia Structofold chairs to you as a convenient as well as a beautiful addition to your school equipment.

H. O. All-Steel Folding Chair with paneled back and form fitting perforated seat. The frame is made of beautifully rolled steel with heavy wall, high carbon steel tubes for back legs to give added strength and rigidity. Sliding domes on feet, per doz.\$23.20

DOMESTIC SCIENCE FURNITURE

The Nation's health is more influenced by food than by any other agency. The kitchen, wherein that food is prepared should be especially provided with furniture of sanitary design and aseptic construction. School kitchens should be examples of modern sanitation.

For many years hospitals have demanded steel equipment for operating rooms and contagious wards because this type of furniture does not harbor germs and filth. And on account of this sanitary feature of steel furniture it is by far the best for the Domestic Science Department.

Columbia Domestic Science Equipment is manufactured under the direction of our Hospital Furniture Department and is made and finished with the same painstaking care and attention to detail as those pieces that go into the surgeries of the finest American hospitals.

COLUMBIA SCHOOL SUPPLY COMPANY

The Princess Sani-Steel Cabinet is modern in design and sturdy in construction. It is of rigid steel and finished in white lacquer. This is an ideal instructor's cabinet and is very suitable for the modern school kitchen.

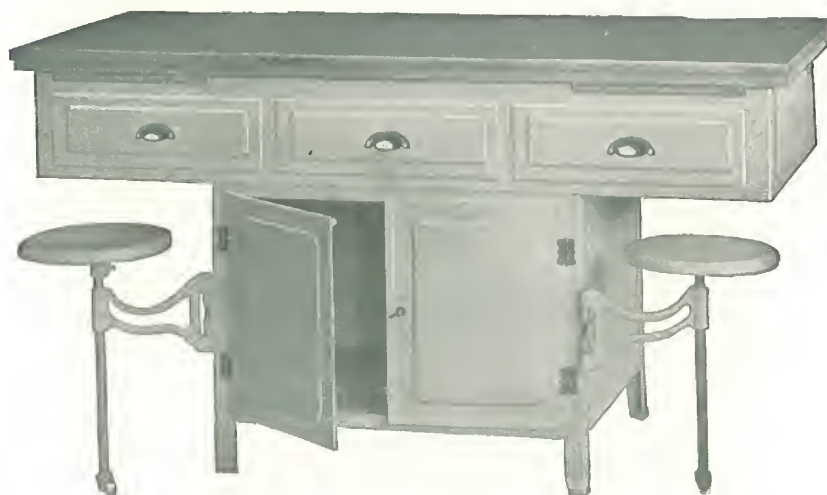

The porcelain table top is 33 inches high, 25 inches deep and 40 inches wide. It is a full extension top and may be removed if you wish. The upper cabinet is 36 inches high, 12 inches deep and 40 inches wide; the total height is 69 inches.

A large glass sugar container, a bread board, and coffee, tea and five spice jars of crystal glass are included with every cabinet.

We are able to furnish these cabinets without the top to be used before a window, in the center of the room or in any place where the complete cabinet could not be used. These are identical in every respect to the cabinet illustrated above except that a guard rail takes the place of the top.

No. 1250 SURGICAL CABINET

First Aid Room Furniture

The modern school is equipped with an up-to-date first-aid room. Our Surgical and Hospital Furniture Departments manufacture an extensive line of equipment especially designed for this purpose. A selection from the Columbia Line will give you a model first-aid installation. We will be pleased to send you our illustrated catalogue "M" if you desire further information.

ORIGINATORS OF STEEL FURNITURE FOR SCHOOLS

The Columbia Manual Training Bench

The Columbia Manual Training Bench is another member of the Indestructo Steel Family. Many units equipped by us more than twenty years ago are still in constant use in fine condition.

The adjustable feature enables the instructor to fix the height to best accommodate the boy who works with the bench. It is very rigid at any height. The heavy steel frame will last for generations.

The bench top is made of many thicknesses of hard wood with flat surfaces joined together so that the student works on the edge as in a tailor's cutting table or a butcher's block. And the surface may be scraped off as in a butcher's block. We have found great value in this method of construction. The underside of the top is bound together by hard wood plates and by the steel frame as shown.

We give an illustration of the rapid acting vise, showing the simplicity of its construction. It may be used as a continuous screw or rapid acting as desired. There are no delicate or complicated parts to break or get out of order.

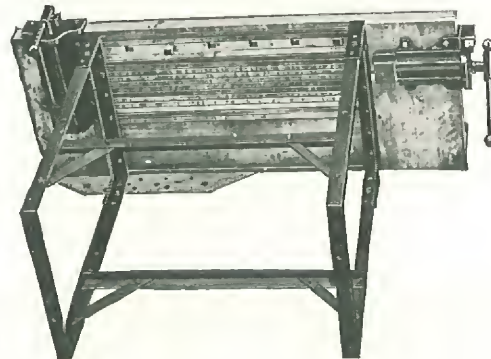

The Indianapolis Schools have been using hundreds of these benches for over twenty years. They are in use in over a thousand other cities.

COLUMBIA RAPID ACTING VISE illustrated on the opposite page may also be used as a screw vise. Heavy, well reinforced cast iron jaws with cold rolled steel guides. The screw works in a bronze half nut as shown; when the handle or front jaw is raised the screw is disengaged from the half nut and may be rapidly adjusted to the work.

ADJUSTABILITY IS OF MUCH VALUE.

For One Drawer under bench, add.....	2.00
For Two Drawers in cabinet, add.....	4.00
For Three Drawers in cabinet, add.....	8.00

Columbia Steel Adjustable Bench

The Frame is made of angle steel. Each joint between the upper and lower segments is fastened by two heavy bolts, one on each side of the angle at the height desired.

The Top Fastening is made by screws entering the under side through the flat flange of the steel. Thus it will be seen that the top is firmly bound together at each end by the steel angles.

Our benches are shipped K. D. in compact crates and take second-class rates.

The Top is composed of a built-up hardwood front 13 in. wide by 1¾ in. thick and a 7-in. tool well with tool rack, as shown, thus making the top 20 in. wide and reinforced by hardwood cleats.

Tops for Nos. 5 and 6 are 20x41 in. Weight with 1 vise, 125 lbs.; with 2 vises, 150 lbs.

No. 5, with one rapid acting vise.....\$15.00

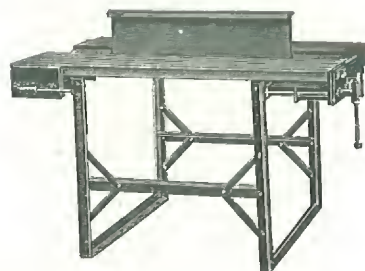

No. 6, with two rapid acting vises..... 20.50

Tops for Nos. 10 and 11 are 20x51 in. Weight with 1 vise, 130 lbs.; with 2 vises, 155 lbs.

No. 15, with 2-8R rapid acting vises..... 26.00

Columbia Rapid Acting Vise, each.....\$5.50

ORIGINATORS OF STEEL FURNITURE FOR SCHOOLS

COLUMBIA LABORATORY FURNITURE

No. 9 Physic's Laboratory Table

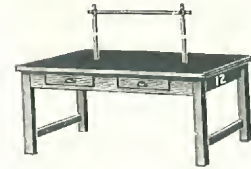

No. 9. Physics Laboratory Table of standard size. Used more widely than any other design because of its heavy construction and the convenience of the cross bars. The top is of built-up maple, 6x3½ ft., 30 inches high and 1¾ inches thick. It extends out over the frame to allow the attachment of clamps at any point. The legs are 4 inches square. The frame contains four drawers, two on each side, with locks. The uprights allow free adjustment and firm fastenings. If desired, we will furnish metal standards and cross-bar in place of the wood for the same price. The finish of the table frame is in oil, black acid-proof finish on top. The table weighs about 300 lbs. and is shipped K. D. in crates. Price complete.....\$56.00

9½.	Same as 9, but without drawers.....	50.00
15.	Same as No. 9, but without the standards and cross-bars.....	48.50

No. 15. Biological Laboratory Table, same as No. 9 Physics Table, but without standards and cross-bars\$48.50
No. 12. Table, same as No. 10 but without the drawers.....\$56.50

COLUMBIA LABORATORY CABINET

The most complete and useful ever manufactured. Study the specifications carefully. If you do not have water pressure in your laboratory, this equipment will be a wonderful help to you. Note, also, the arrangement for air pressure and the electrical switchboard, with battery connections. The wood parts are built up of five layers of wood, firmly bound together, and will not warp. The top of the cabinet is 29 in. wide by 86 in. long, when leaves are extended. It is made of five-ply, built-up oak with acid-proof finish.
Price for the complete cabinet as shown, including the air-pump, tank with check valves, pressure gauge, pantry cock, two removable nickeled standards, and electrical switchboard \$92.00
Price for the cabinet and standards, but without the other parts..... 57.00
The top of the cabinet is 29 in. wide by 86 in. long, when leaves are extended. It is made of five-ply, built-up oak with acid proof finish. The body of the cabinet is of oak finished golden.

GERMINATING BED

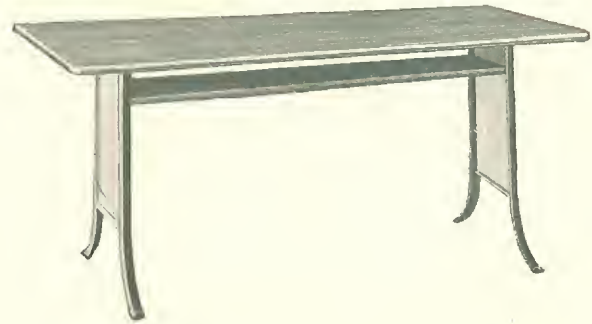

6070. Made of extra heavy sheet steel with steel frame and supports on casters. Size, inside measurements, 26½ in. by 72 in. by 4 in. deep at the sides, dipping gently to the center, where is placed a drain covered with close brass screen and a funnel beneath. Partitions may be made with lumber or metal. Frame is collapsible, so the table may be packed away when not in use; finished olive green.....\$17.00
